Examiner's statement of reasons for allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 1 and 12 are allowed because Prior art fails to show a particle beam source having a plasma chamber formed between an upstream electrode and a middle (mesh) electrode; and an accelerating chamber formed between the mesh electrode and a downstream electrode, emitting an accelerated beam from the downstream electrode; wherein the mesh electrode comprises a cross mesh having a wire thickness and width of 0.1 - 0.5 millimeters and an open area ratio of 85% or less and an aspect ratio of open areas provided in said mesh electrode that is less than 1; wherein charge exchange takes place in the beam downstream electrode, resulting in an emission of a neutral particle beam, and wherein each of the beam-emitting holes formed in the beam-emitting electrode on the downstream end has a length-to-diameter ratio of 2 or greater.
2. Claims 5, 11, 13, 14, and 22 are allowed by virtue of their dependency upon allowed claims 1, and 12.
3. The examiner agrees with Applicant's arguments presented in the amendment filed 2-08-2005, particularly the applicant's explanation of the criticality of the claimed electrode dimensions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
